# Cleaning records by hand

You don't need a record cleaning machine to enjoy the benefits of the Audio Intelligent cleaning formulas.

Although a vacuum record cleaning machine will make the process quicker, easier and provide better fluid pickup, careful cleaning by hand is quite effective.

# Everything you need

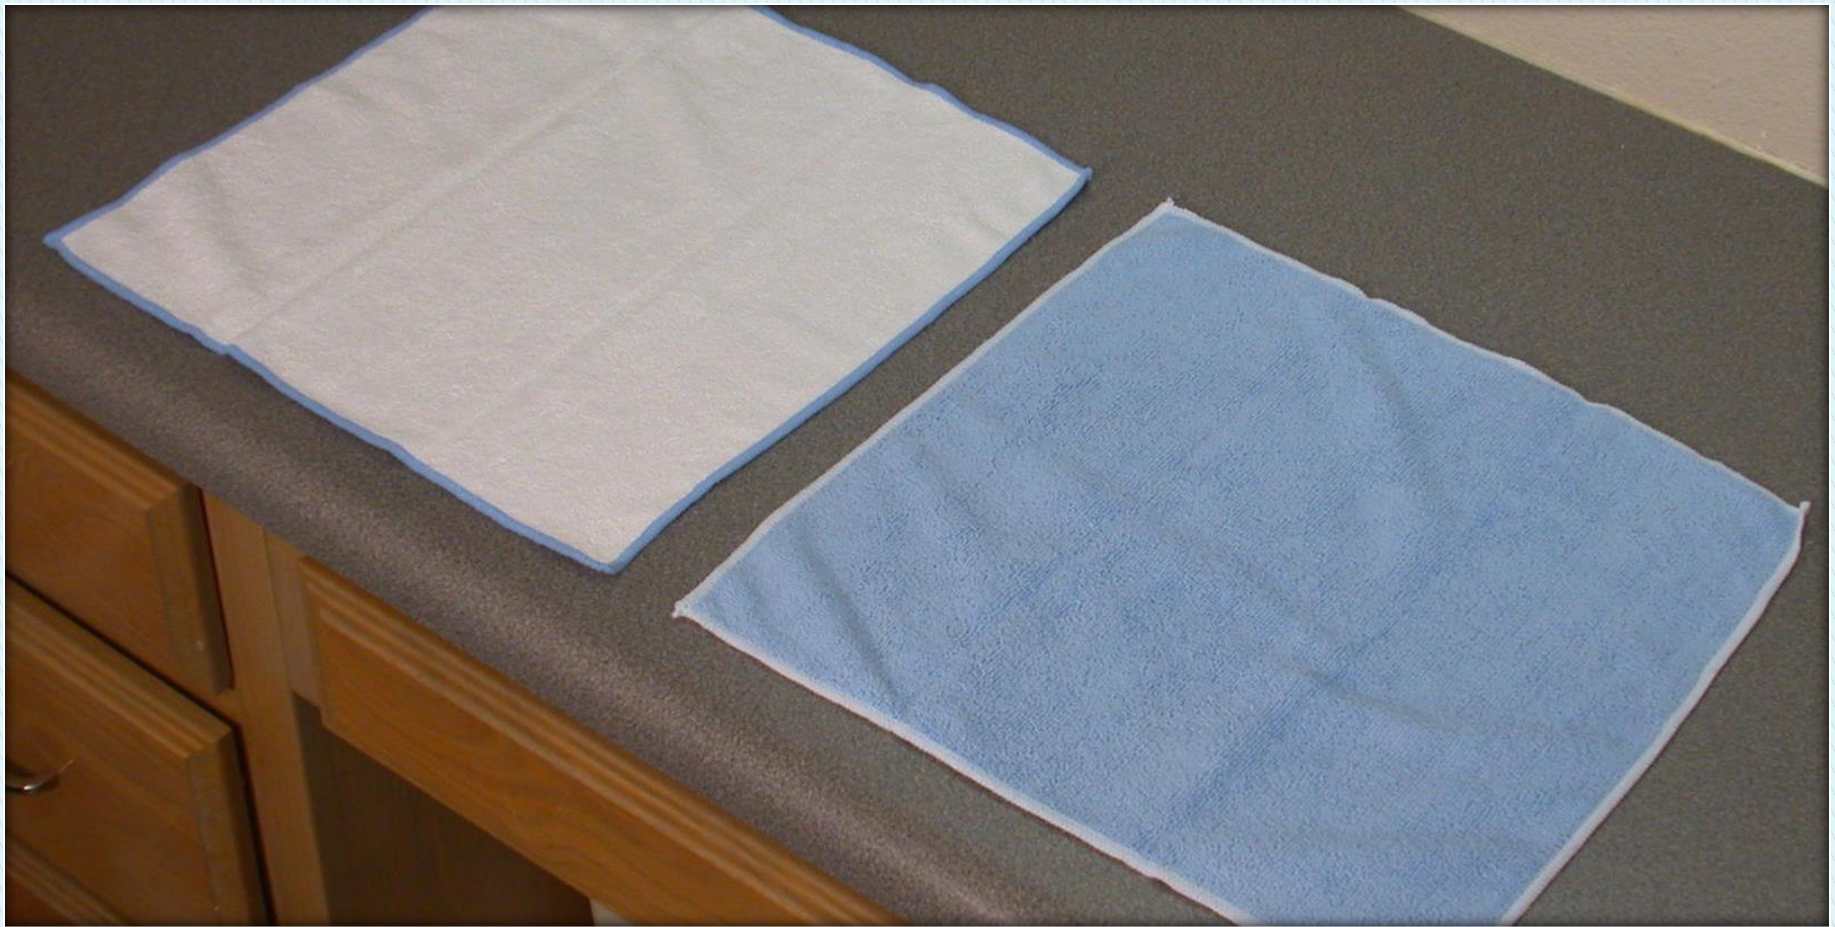

**Our Complete Record Cleaning Kit** includes everything you need to make your records sparkle!

- ▶ One quart Audio Intelligent Premium One Step No. 6 cleaning solution
- ▶ Premium fluid applicator brush
- ▶ Four high quality microfiber towels

# Let's get Started!

## Step #1 >>

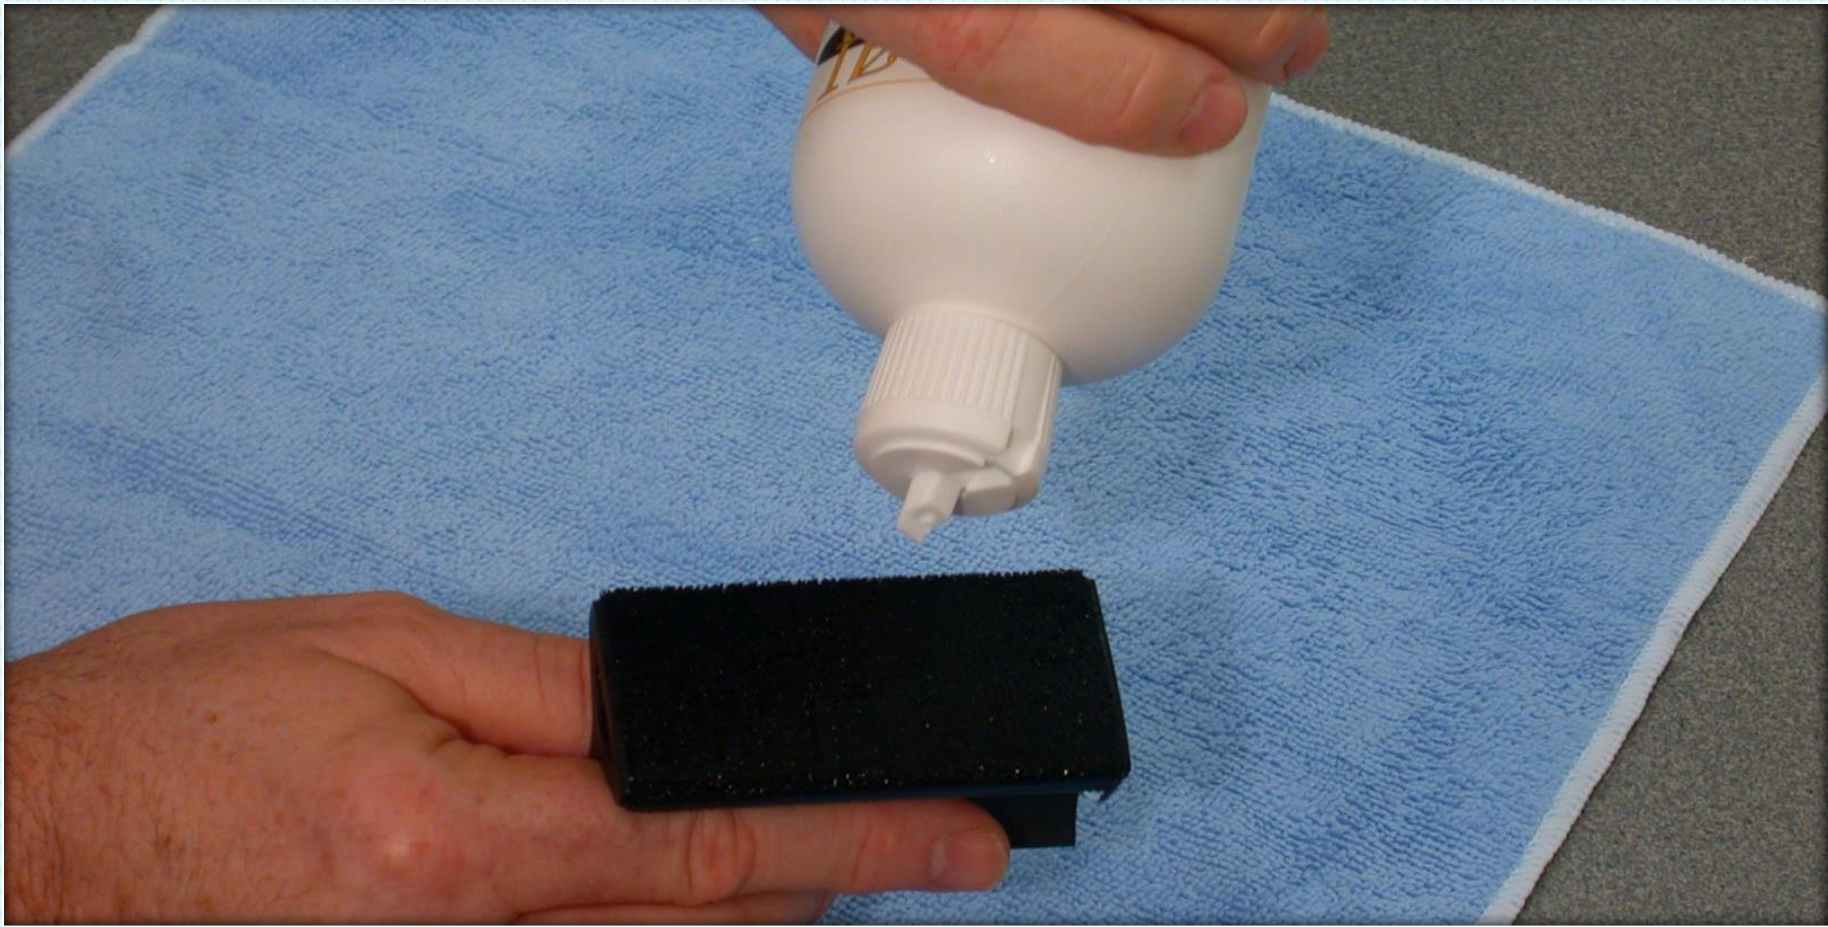

Lay out two microfiber (or cotton) towels on a waterproof work surface, such as a kitchen countertop

## Step #2 >>

Place the record to be cleaned on one of the towels

### Step #3 >>

Saturate the cleaning brush (not the record) with solution until the fluid just begins to drip

## Step #4 >>

Using a circular motion, gently work the fluid into the grooves for about 1 – 3 minutes. Only very light pressure is required

## Step #5 >>

Let the solution stand for 1 – 3 minutes. Heavily soiled records may require additional time to loosen stubborn debris, but do not allow the fluid to dry on the record. Reduce soak time if need be.

## Step #6 >>

Use your finger like a squeegee to remove excess liquid from the brush

## Step #7 >>

With the same circular motion you used when applying the solution, remove excess fluid from the record

## Step #8 >>

Dry the record completely with the microfiber towel

## Step #9 >>

Flip the record over and place clean side down on the other microfiber towel and repeat the cleaning process

## Step #10 >>

Allow the record to air dry before placing it back in the jacket. A dish drainer works well for this

# Finished!

- ▶ We think you'll be very happy with the results! Your records will sound better, look better and last longer.
- ▶ Cleaning your records is the best way to preserve your valuable collection.
